January 2010
Issue: 09-11

Exports ◆ November 2009

- The value of British Columbia origin exports fell 25.4% over the first 11 months of 2009 compared to January to November of 2008. Exports to most of BC's major trading partners have declined, including the United States (-28.0%) and Japan (-31.0%). However, Mainland China has bucked the trend, with shipments to that country increasing 24.1%.

- Virtually all major commodity categories have experienced a slump in the value of exports year-to-date to November. Shipments of forest products have dropped off significantly with exports of solid wood products falling 24.9% and pulp and paper shipments declining 27.0%.

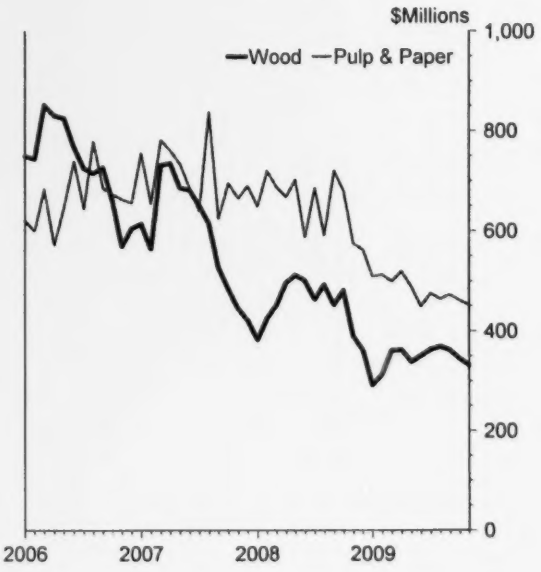
- Exports of energy products have also seen substantial declines, falling 30.9% over the first 11 months of 2009 compared to the same period a year earlier. A combination of price declines and reduced demand have resulted in a 57.7% drop in the value of electricity exports. Natural gas shipments have declined 44.0% solely due to lower prices, as volumes exported have actually increased 14.9%. International shipments of coal have slumped 23.1%, while exports of other energy products, including crude petroleum, are down 3.2%.

- In addition to falling shipments of coal, BC's mining sector has also experienced a drop in exports of metallic mineral exports, with shipments slumping 29.9% year-to-date. Exports of copper ores and concentrates fell 14.7%, shipments of molybdenum ores and concentrates plunged 54.7% and unwrought aluminum (-36.9%) and zinc (-26.0%) also experienced significant declines in the value of exports. There was also a drop in exports of fabricated metal products (-32.4%).

- The value of exports of machinery and equipment fell 19.8%, led by a 33.6% decline in shipments of motor vehicles and parts and an 18.8% drop in exports of electrical, electronic and communications products.

- The agricultural sector, which was the one bright spot in the export picture earlier in the year, saw a 16.7% drop in the value of exports in November 2009 compared to the same month in 2008, which drove the year-to-date figures into the red as well. Compared to the January to November period in 2008, exports of these goods dipped 0.3% over the first 11 months of 2009.

Forest product exports continue to trend down



SEASONALLY ADJUSTED EXPORTS

Seasonal adjustment supplies a means of making month-to-month comparisons by removing the regular periodic seasonal fluctuations that occur. Variations from normal seasonal patterns are revealed in the seasonally adjusted data series.

- Exports climbed for the second straight month in November, inching up 1.5%. The largest increases were for energy products (+3.9%) and industrial and consumer goods (+2.5%). Exports of forest products also grew (+1.7%).

- Most of the growth was in shipments to overseas destinations (+2.7%) as exports to the US were fairly flat, edging up only 0.4%. A 12.6% jump in exports of energy products was the primary driver in increased shipments to overseas destinations, offsetting a 14.6% drop in exports of agriculture and fish products.

Exports (adjusted for seasonality) climbed slightly in November

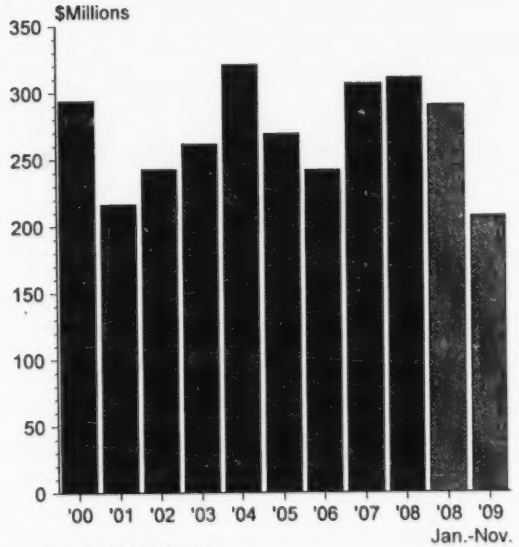
BC's Exports to Oceania Watered Down in 2009

Over the first 11 months of 2009, the value of BC's commodity exports to Oceania fell by 29% compared to the same period a year earlier. The slump was largely the result of declines in shipments of forest products, particularly wood and articles of wood (-41%), but also wood pulp (-18%). Another good contributing significantly to the overall drop was sulphur (mainly used as a fertilizer), shipments of which plunged 91%. A drop in exports of sporting equipment and toys (-90%), particularly equipment for water sports, such as skis, were another significant factor in the overall slump in shipments from BC to Oceania.

BC exports to Oceania dropped off significantly in 2009



Source: Statistics Canada

Oceania consists of the continent of Australia and the surrounding islands in the South Pacific, including New Zealand, Papua New Guinea, Fiji, the Solomon Islands and a host of smaller islands, as well as some of the US territories in the North Pacific. The bulk of British Columbia's exports to Oceania are to Australia and New Zealand, with all other destinations comprising only 3% of the total in 2008.

BC's exports to Oceania were concentrated mainly in Australia and New Zealand in 2008

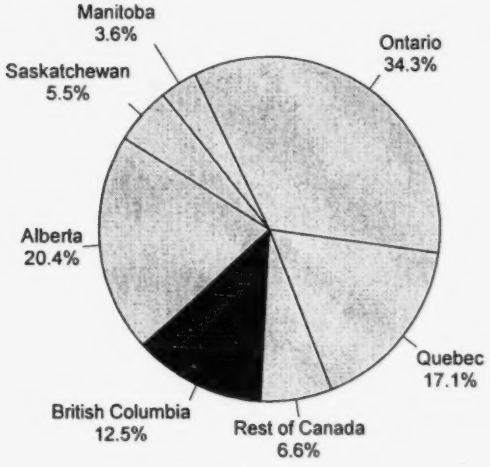
In 2008, BC ranked fourth among the provinces as an origin for Canadian exports to Oceania, with 12.5% of Canadian commodity shipments to that region originating in British Columbia. Ontario was the source of 34.3% of Canadian exports to Oceania, followed by Alberta, at 20.4%, and Quebec, at 17.1%.

British Columbia ranked fourth among the provinces in exports to Oceania in 2008

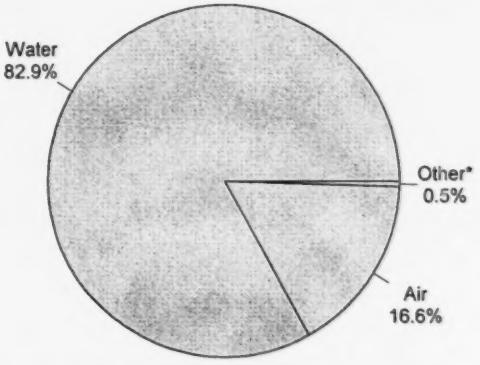


Source: Statistics Canada

Canada's top exports to Oceania include machinery, meat products and aircraft. The main types of machinery shipped to that region are those related to agriculture, while pork products comprise the bulk of the meat exported to Oceania from Canada. British Columbia's top exports to Oceania include wood and articles of wood, machinery and pulp.

Given the remote location in the South Pacific, it is not too surprising that the main mode of transport of the goods shipped to Oceania is by boat. Approximately 83% of BC's commodity exports to Oceania in 2008 were shipped by boat, with the remainder transported by plane.

Most of BC's commodity exports to Oceania were shipped over water by boat in 2008



*Other includes goods that were shipped by road or rail into the US before being loaded aboard another freight carrier as well as goods that were sent by mail or courier

Source: Statistics Canada

The distance of this region from Canada and the consequent high shipping costs is one of the challenges facing exporters looking to expand trade with Oceania. Other difficulties include regulatory issues, particularly in Australia and New Zealand, strong domestic and foreign competition, and low awareness of Canadian capabilities.[1]

Australia

Australia is by far the largest market in Oceania and most of BC's exports to that region flow to Australia (70% in 2008). British Columbia shipped $217.5 million worth of goods to Australia in 2008, ranking that country thirteenth as a destination for BC origin commodity exports. Over the first 11 months of 2009, BC's exports to Australia have dropped 20% compared to the same period in 2008.

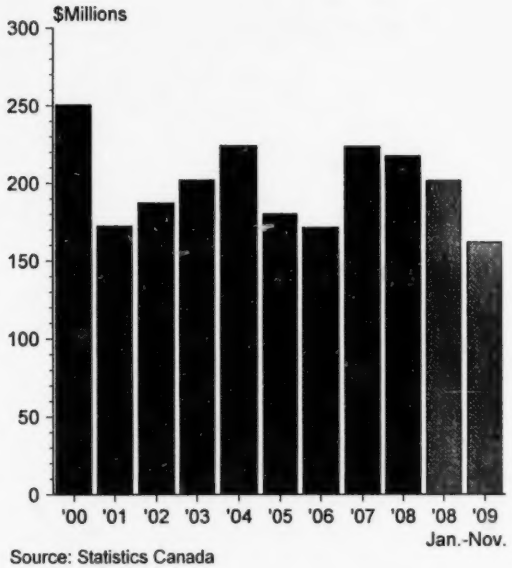
BC exports to Australia have dipped significantly in the last year



Source: Statistics Canada

British Columbia's top export to Australia is softwood lumber and a 41% drop in the value of shipments of this good is one of the main drivers of the slump in overall exports over the first 11 months of 2009 compared to the same period a year earlier. Other goods that contributed to the overall decline include sporting equipment, pulp and sulphur, all of which were among the top four exports from BC to Australia in 2008. There were also a few large increases that partially offset some of the overall slump, including motor vehicle parts and equipment, and engines in particular.

Australia's top export is coal and, in fact, Australia is the top exporter of coal in the world. Given that coal is also a significant export from British Columbia, Australia represents the province's largest competitor in the coal market.

Australia's top imports include petroleum, automobiles and gold. While Canada has some of the world's largest oil deposits, most of Australia's petroleum imports are from Southeast Asia and very little is imported from Canada, probably due to the substantial distances involved and the closer proximity of other petroleum producers. While motor vehicle parts and equipment are a significant export from BC to Australia, the fact that Australians drive on the left side of the road and the vehicles are therefore right hand drive limits opportunities for Canadian automobile exporters in that market.

Some areas where Canadian exporters may find opportunities in Australia include telecommunications, environmental technologies and health products, including pharmaceuticals.

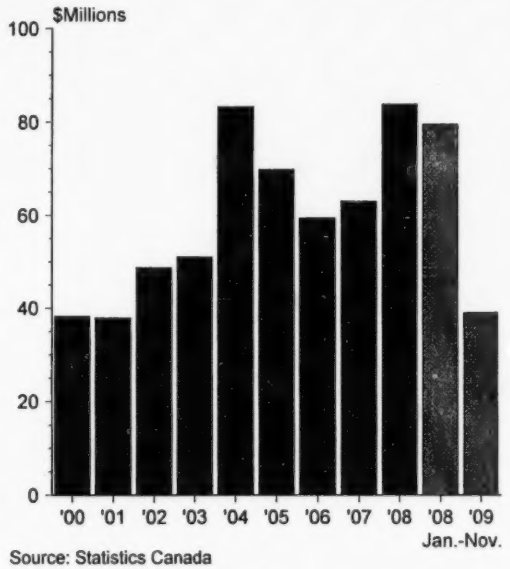
New Zealand

In terms of population, New Zealand is similar in size to British Columbia and there are also many similarities in the topographies of the two regions; however, given the distance between them, there is not a great deal of trade between the two areas, although BC was the origin of almost a fifth of Canadian exports to New Zealand in 2008. In that year, New Zealand ranked 25th as a destination for BC origin commodity exports, with only $83.7 million worth of goods shipped there. Over the first 11 months of 2009, exports from BC to New Zealand fell dramatically to less than half the value shipped in the same period in 2008.

A precipitous decline in shipments of sulphur (-96%) was the main contributor to the overall slump. Sulphur was the top export from BC to New Zealand in 2008, so a drop of that magnitude has had a huge impact on BC's overall exports to that country. Other large declines in shipments to New Zealand include softwood

lumber (-43%) and various types of machinery, particularly agricultural machinery.

BC exports to New Zealand plunged in 2009



Source: Statistics Canada

New Zealand's exports are dominated by agricultural products, particularly dairy products and sheep and bovine meat. The country's main imports include petroleum, automobiles and computers. Similar to Australia, most of New Zealand's petroleum imports are from regions of closer proximity and very little petroleum is imported from Canada. Also, as with Australia, New Zealanders drive on the left side of the road, so again, automobile export opportunities are limited for Canadian producers.

Some market possibilities for Canadian exporters in New Zealand include machinery and equipment, electronics and plastics.

While the physical distance between Canada and Oceania will be an ongoing challenge in attempts to develop stronger trade ties, given the common language and cultural similarities between Canada and several of the countries of Oceania, including the larger centres of Australia and New Zealand, there are opportunities available for Canadian exporters and this is a region that should not be ignored.

NOTES

Countries Included Within World Regions:

(1) Western Europe: United Kingdom, Ireland, Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland.

(2) Eastern Europe: other Europe, including all of Russia, Georgia, Kazakhstan, Kyrgyzstan, Moldova, etc.

(3) South East Asia: Malaysia, Brunei Darussalam, Singapore, Myanmar, Kampuchea, Laos, Indonesia, Philippines, Thailand, Vietnam.

(4) Africa: continental Africa, excluding Ethiopia, Libya, Somalia, Sudan, Egypt.

(5) South America: continental South America from Colombia and Venezuela south to Chile and Argentina, including offshore islands, but not Caribbean.

(6) Central America and Caribbean: from Guatemala and Belize to Panama, plus Caribbean Islands.

(7) Pacific Rim (including Japan): Japan, Hong Kong, Malaysia, Brunei Darussalam, Singapore, Laos, Mongolia, China, Indonesia, North Korea, South Korea, Philippines, Macau, Taiwan, Thailand, Vietnam, Australia, Fiji, New Zealand.

(8) Pacific Rim: as above, but excluding Japan.

(9) Middle East: from Turkey and Iran south through the Arabian Peninsula. Excluding Afghanistan and Pakistan, but including Cyprus, Ethiopia, Egypt, Somalia, Sudan and Libya.

The **European Union** is the membership as of January 1, 2007: Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, United Kingdom.

'Selected Value-added Wood Products' category includes prefabricated houses, doors, windows, furniture, moulding, siding, etc. It does not include panel products, shakes, shingles or any pulp and paper products.

Revisions

Statistics Canada revises trade data for the previous three data years with release of the December data. The revision number is indicated in the footer of the tables (e.g., Rev 1 is the first annual revision, etc., and Prelim indicates it is the first release of data to December for that year). In addition to annual revisions, Statistics Canada revises the data for the previous data year every quarter (indicated in the footer by Rev Q1, etc) as well as with the release of the January and February data.

Service Offered for Detailed Trade Statistics

For BC government statistics users requiring more detailed information on exports or imports, a special report service is offered through the address below:

Dan Schrier
BC Stats
P.O. Box 9410 Stn Prov Govt
Victoria, B.C. V8W 9V1
(250) 387-0376

This service is provided through the Trade Research and Inquiry Package (TRIP) computer reporting system. TRIP offers user-defined tabulations of export or import statistics for BC, Canada, the United States and other countries. Tabulations can include information on commodities, countries, US states, years, months, mode of transport, etc.
